Setting Up *Intercompany Reconciliation Process* (40Y)

© 2026 SAP SE or an SAP affiliate company. All rights reserved.

Content

1 Purpose. 3

2 Create Technical Communication User. 4

3 Create Communication System. 5

4 Create Communication Arrangement 6

5 Test API (Optional). 7

1 Purpose

This scope item provides advanced intercompany reconciliation functions with pure Fiori UI to enable the transaction level smart reconciliation capability and to support the streamlined company to corporate closing process.

The key business benefits include:

- Real time reconciliation and errors detection
- Speed up the month end closing
- Enable sttreamlined company to corporate closing integration
- More automatic process to save operational cost
- Multi-dimensional reconciliation with multi-valuation to support both legal and management used reconciliation

2 Create Technical Communication User

Prerequisite

To carry out the following activity, a business user with a business role must exist. The business role must contain the business catalog `SAP_CORE_BC_COM` (Communication Management), for example, the business role `SAP_BR_ADMINISTRATOR` (Administrator) is required.

Procedure

1. Log onto the SAP Fiori launchpad in SAP S/4HANA Cloud Public Edition system.
2. Choose the *Maintain Communication Users* tile.
3. Choose *New* to create a new user (for example, **`COM0377`**) and enter the description for the user.
4. Assign a password for the user. Please remember the password as it will be used later. Choose *Create*.
5. Note down the user data. This is required when you create the communication arrangement.

3 Create Communication System

Procedure

1. Log onto the SAP Fiori Launchpad in the SAP S/4HANA Cloud Public Edition system.
2. Select the *Communication Systems* tile.
3. Choose *New* to create a new system.
4. Enter a system ID and a system name, for example, **`SAP_COM_0377`**.
5. Choose *Create*.
6. Enter information regarding the system you wish to integrate in the *Technical Data* section.
7. Enter host name. The host name is the server where you trigger the API. If you don't need a host to receive the API trigger status, you can leave any value here.
8. In the *User for Inbound Communication* section, choose *New* to add new user, and then select the user you created in Create Technical Communication User [page 4].
9. In the *User for Outbound Communication* section, choose *New* to add new user. If you maintain the valid host name in the *General* section, the user should exist in the host. Otherwise input any user value here.
10. Choose *Save*.

4 Create Communication Arrangement

Procedure

1. Log onto the SAP Fiori launchpad in the SAP S/4HANA Cloud Public Edition system.
2. Choose the *Communication Arrangements* tile.
3. Choose *New* to create a new communication arrangement.
4. Choose `SAP_COM_0377` (Communication Scenario ID).
5. Adapt the *Arrangement Name* if required.
6. Choose *Create*.
7. In the *Common Data* section, select the *Communication System* from the input help that was created in Create Communication System [page 5].
8. The technical user that was created in Create Technical Communication User [page 4] is automatically added to the *Inbound Communication* and *Outbound Communication* section. Choose *Save*.
9. The system generates the WSDL automatically. Choose Download WSDL to download the file for future use.

Result

The communication arrangement has been activated.

5 Test API (Optional)

After the communication scenario is set up, you can test the API.

For detailed test steps, please refer to note 2815332.

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.
The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
